# Updating

Replace the following files to implement the update into an existing site:

1. Replace all .css files in the /css directory apart from custom-style.css.
2. Replace /fonts directory.
3. Replace /img/slides directory.
4. Replace
  - /js/bootstrap.js
  - /js/bootstrap.min.js
  - /js/script.js
  - /js/script.min.js
5. Add /prism & /slider-revolution directories to /plugins directories.
6. Replace usage of .dropdown-right in favour of .dropdown-menu-right in your HTML files (see: <https://github.com/twbs/bootstrap/issues/10370>)
7. Replace <small> to <footer> usage in blockquotes (about.htm, elements.htm)
8. Replace .well-small & .well-mini usage in HTML file to use .well & .well-sm instead.
9. Replace .badge-large, .label-large, .badge-xlarge, .label-xlarge usage in HTML file to use .badge-lg, .label-lg, .badge-xlg & .label-xlg.
10. Replaced .pull-center usage with .text-center (CSS class still available for 2 more versions)
11. Add in new pages:
  - 404 (404.htm)
  - Flexslider default (flexslider-default.htm)
  - Slider revolution default (slider-revolution-default.htm)
  - Slider revolution full (slider-revolution-full.htm)
  - Slider revolution behind (slider-revolution-behind.htm)
  - Slider revolution boxed (slider-revolution-boxed.htm)
  - Navbar full (navbar-full.htm)
